SUBJECT INDEX

A

ACTH, hypertensive effect in hypophysectomized rat, 64
Amylnitrate, effect on ventricular gradient, 341
Aneurysm, multiple, 474
Anticoagulant therapy, for myocardial infarction, 549
Antihypertensive treatment, prolonged use, 399
Antiserum, to human fibrin and human β-lipoprotein, 109, 110
Aortic insufficiency, low-frequency vibrocardiography of, 3
Aplasia, of kidney, and renovascular hypertension, 373
Arrhythmia
  induced by digitalis, effect of potassium, 456
  A-V dissociation, in reticulosarcomatosis, 180
  double A-V nodal rhythm, 171
Arterial disease, in Japan, 199
Arteriography, and cerebral circulation of cerebrovascular diseases, 495
Aschner's reflex, and ventricular gradient, 339
Atropine
  Effect on ventricular gradient, 340
  effect on coronary blood flow, 328
Atherosclerosis, and β-lipoprotein, 397
Austin Flint murmur, 9

B

Beriberi heart, and thiamine, 150
Binary logic system, applied for electrocardiographic interpretation machine, 212
Blood distribution, postural change of, 115
Blood electrolytes, effect of dietary potassium, 272
Blood lipid, in cerebrovascular diseases, 101
Blood sludge, in bulbar conjunctiva, in rheumatic fever, 535
Brain circulation
  by external counting, 127
  — — time, 130

C

Cardiac event, and vibrocardiogram, 414
Cardiac nerve stimulation, effect on ECG and VCG, 359
Cardiac output
  common carotid artery occlusion, 53
  continuous observation with flowmeter, during cardiovascular reflexes, 49
  mixed nerve stimulation, 52
  postural change of, 115
  sinus nerve stimulation, 51
Cardiovascular reflexes, and continuous observation of cardiac output, 49
Catecholamines, effect on coronary blood flow, 331
Catheterization, left heart, transseptal, 301
Central nervous system, chronic stimulation of diencephalon, 260
  hypothalamus, regulation of cardiovascular system, 268
Central nervous system, effect on coronary blood flow by stimulation, 323
Cerebral circulation, of cerebrovascular diseases, 495
Cerebral hemorrhage, in experimental renal hypertension, 466
Cerebrovascular diseases
  and blood lipids, 101
  arteriography and cerebral circulation, 445
  cerebral circulation of, 495
  epidemiological studies in Hisayama, Japan, 12
Chiyoda, a Japanese rural population, epidemiologic studies on hypertension and coronary heart disease, 106
Cholesterol, in cerebrovascular diseases, 101
Circulation time, arm to brain, 133
Clearing factors, activated by stroke, 106
Coarctation, of abdominal aorta, 562
Co^{60} irradiation, effect on A-V dissociation in reticulosarcomatosis, 180
Computer, in diagnosis of heart disease, 99
Congenital heart disease, of infants, surgical treatment, 297
Coon's method, 110
Cranial blood flow, 133
Coronary blood flow
  and stimulation of central nervous system, 323
  effect of atropine, 328
  effect of catecholamines, 331
Coronary heart disease, epidemiologic studies in Chiyoda, Japan, 37

D

Dacron prosthesis, treated with gelatin sponge, 512
Depressor reflex, from kidney, 254
Dexamethazone, effect on uptake and metabolism of H^3-CA, 224
Dietary potassium, effect on ECG and blood electrolytes, 272
Diencephalon, chronic electrical stimulation and hypertension, 260
Digitalis, arrhythmia induced by, effect of potassium, 456

E

Electrocardiography
  effect of dietary potassium, 272
  high gain, 384
  in subarachnoid hemorrhage, 583
  changes by cardiac nerve stimulation, 359
  changes in a Japanese rural population, Chiyoda, 42
Electrocardiographic interpretation machine, 212
Electromagnetic flowmeter, continuous observation of cardiac output, 49
Endocardial cushion defect, 287
Endocardial fibroelastosis, 85
Endocrine organs, in spontaneously hypertensive rats, 57
External counting,
  of brain circulation, 127
  of cardiac output, 115
Extrasystole, familial polytopic and polymorphic, 81

F

Familial extrasystole, polytopic and polymorphic, 81
Fibrinogen, role on lipid deposition into aorta, 108
Fibrinoid necrosis, of artery, in experimental renal hypertention, 469
Fibroelastosis, diffuse endocardial, 85
Frank's lead
  in left ventricular hypertension, 543
  in ventricular gradient, 337

G

Gallop rhythm
  atrial, 209
  pathogenesis in renal insufficiency, 210
  phonocardiographic studies of renal insufficency, 201
  protodiastolic, 209

H

Heart
  amylnitrite, effect on ventricular gradient, 341
  anticoagulant therapy for myocardial infarction, 549
  arrhythmia
    A-V dissociation, 180
    digitalis-induced, 456
    double A-V nodal rhythm, 171
    familial Es, 81
  artificial pacemaker, 456
  atropine,
    effect on coronary blood flow, 328
    effect on ventricular gradient, 340
    beriberi heart, 150
  central nervous system, effect on coronary blood flow, 323
  Co^{60} irradiation, effect on A-V dissociation, 180
  computer, in diagnosis of heart disease, surgical treatment, 297
  congenital heart disease, epidemiologic studies, 37
  dietary potassium, 272
  ECG
    cardiac nerve stimulation, 4, 359
    effect of potassium, 272
    telemetering, 312
  endocardial fibroelastosis, 85
  ischemic heart disease, in Japan, 549
  left transseptal catheterization, 301
  muscular subaortic stenosis, 574
  myocardial damage, See myocardial infarction
  rheumatic heart diseases, 532
  selective cardioangiography, 306
  stellate ganglion, stimulation, 359
  supraventricular paroxysmal tachycardia, 142
  ventricular gradient, 337
Hisayama, in Japan, epidemiological studies on cerebrovascular diseases, 12
Hypertension
  cumulative survival rate, 403
  effect of prolonged antihypertensive treatment, 399
  epidemiologic studies in Chiyoda, a Japanese rural population, 37
  experimental studies in spontaneously hypertensive rats, 57

mortality, 406
renovascular, with aplasia of kidney, 373

I

Intracardial electrocardiography by transseptal catheterization, 305
Ischemic heart disease, epidemiologic survey in Japan, 549
Isovolumetric contraction, ratio of, and ejection times, 414

K

Kidney
depressor reflex, 254
gallop, phonocardiographic studies, 201
Kinetocardiography, 8

L

Lead system, for telemetering, 312
Left ventricular hypertrophy,
and VCG, 543
criteria for Japanese, 42
Levocardia, with abdominal situs inversus, 243
Lipid deposition
into aorta, 108
into arterial wall, 397
β-lipoprotein, and atherosclerosis, 397
Lissajou's figure, 315
Low-frequency vibrocardiography
apical tracing, 5
atrial upstroke, 7
bulge, 7
ejection upstroke, 7
mid-systolic outward deflection, See bulge of AI, 3

M

Macroaggregated albumin, labelled with I^{131}, and regional pulmonary blood flow, 431
Muscular subaortic stenosis, 574
α-Methyl Dopa
antihypertensive mechanism, 237
effect on uptake and metabolism of H^3-CA, 224
Metopiron, activation of subclinical rheumatic activity, 532
Middle aortic syndrome, See panaortitis syndrome
Minnesota Cord, 20, 550
Myocardial infarction,
and anticoagulant therapy, 549
and U vector, 353
clinical features in Japan
general findings, 497
clinical symptoms and signs, 501
prognosis, 505

N

Negative U, 45
Nialamide,
effect on uptake and metabolism of H^3-CA, 224
mechanism of antianginal effects, 238
Norepinephrine, effect on beriberi heart disease, 153

P

Pacemaker, artificial, effect on digitalis-induced arrhythmia, 456
Panaortitis syndrome, 572
Paroxysmal tachycardia, supraventricular, bovine, 142
Phonocardiography, standardization, 558
Phospholipid, in cerebrovascular diseases, 108
Postural changes
blood distribution and cardiac output, 115
effect on ventricular gradient, 340
Potassium, effect on digitalis-induced arrhythmia, 456
Pulmonary blood flow, regional, and use of MAA labelled with I^{131}, 431
Pulmonary stenosis, with cushion defect and transposition of great vessel, 287
Pulmonary thromboembolism, in Japan
autopsy findings, 453
clinical manifestations
ECG findings, 452
radiologic findings, 451
incidence, 445

Q

QRS vector, in left ventricular hypertrophy, 545
Quantitative scanning method, regional pulmonary blood flow, 431

R

Rat, spontaneously hypertensive, and endocrine organs, 57
Regional pulmonary blood flow
use of MAA*, 431
in mitral stenosis, 438
in congestive heart failure, 438
Renal circulation, and stimulation of spinal cord, 69

Renal hypertension, experimental, and cerebral hemorrhage, 466
Renovascular hypertension, with aplasia of kidney, 373
Reserpine, effect on uptake and metabolism of H^3-CA, 224
Reticulosarcomatosis, and A-V-dissociation, 180
Rheumatic heart diseases, activated by metopirone, 532
Right atrium dilatation, with endocardial fibroelastosis, 85
RISA, intravenously injected, in study of brain circulation, 127

S

Seldinger's technic, 302
Selective cardioangiography, with transseptal left catheterization, 306
Situs inversus, abdominal, with levocardia, 243
Spinal cord, electrical stimulation, and renal circulation, 69
Stellate ganglion stimulation, effect on ECG and VCG
left, stimulated, 363
right, stimulated, 360
Steroid hormone, effect on A-V dissociation, 180
Subaortic stenosis, muscular, 574
Subarachnoid hemorrhage, and abnormal ECG, 583
Subclinical rheumatic activity, activated by metopiron, 532
Surgical treatment, of cardiac lesions, of infants, 297

T

Telemetering, of exercise ECG, 312
Tension time index, 331
Thiamine, in treatment of beriberi heart disease, 150
T loop, in hypertension, 547
Transposition of great vessels, with cushion defect and pulmonary stenosis, 287
Transit time, brain circulation, 130
Transseptal catheterization, of left heart, 301
Triglycerides, in cerebrovascular diseases, 101
Tritiated catecholamine, effect of some drugs on uptake and metabolism of, 224
TSH, as a hypertensive factor of pituitary, 64
T-U junction vector, 350

U

U vector loop
in right ventricular hypertrophy, 348
in right bundle branch block, 348
in myocardial infarction, 353
U wave, etiology, 284

V

Vectorcardiography
in left ventricular hypertrophy, 543
effect of cardiac nerve stimulation, 359
Ventricular gradient, with Frank's lead, and change of heart rate
effect of atropine, 340
—— — Aschner's reflex, 339
—— — postural change, 340
—— — amylnitrite, 341
Ventricular paroxysmal tachycardia, with abnormal P waves, 380
Ventricular septal defect, of infant, surgical treatment, 298
Vibrocardiogram, comparison with intracardial pressure record, 414
Vitacamphor, effect on beriberi heart disease, 152

W

WPW syndrome
in subaortic stenosis, 581
of bovine, 140
